Skills

Front-end
-React.js(Redux, Next.JS), React
Native JavaScript, Vue.js, Three.js,
etc
-JS build tools (webpack, gulp,
grunt)
-core Javascript skills (ES5, ES6),
deep understanding of JavaScript
concepts (Closures, OOP, usage
common Design Patterns in JS)
-HTML 4/5, CSS 2/3, Typescript,
Material UI

Back-end
-Node.js, Java
-SQL (MySQL) and NoSQL
(MongoDB) databases
-RESTful APIs
-Firebase, AWS

Senior React / JavaScript Developer

I have over 5 years of experience in software development. During this time, I was involved in projects of different scale and complexity. I have mainly worked with JavaScript, Node.js, MongoDB, React.js, and Java. Most of my expertise is the development of single-page applications and REST API. I have experience developing Full-Stack architecture, clarifying requirements, and breaking them down into tasks. I have also experience in CLI with Unix and Linux

Front-end
-React.js(Redux, Next.JS), JavaScript, Vue.js, Three.js, etc
-JS build tools (webpack, gulp, grunt)
-core Javascript skills (ES5, ES6), deep understanding of JavaScript concepts (Closures, OOP, usage common Design Patterns in JS)
-HTML 4/5, CSS 2/3, Typescript, Material UI

Back-end
-Node.js, Java
-SQL (MySQL) and NoSQL (MongoDB) databases
-RESTful APIs
-Firebase, AWS

I participated in the full process of the product lifecycle—from the initial interaction with the Customer to product support—in over 10 projects. I performed a range of tasks, including application design from scratch, code re-factoring and optimization, unit testing, requirement analysis, and elaboration.

I am a self-organized, goal- and result-oriented person with good communication and analytical skills. Always open to new interesting challenge work.

Work Experience

April 2017 - December 2019
Full Stack JavaScript Developer | EPAM Systems
Responsibilities:

 • Designed and developed the web application using React and Node and Java.
 • Used Agile methodology for the Software development process.
 • Used GitHub and BitBucket as Source Control Management.
 • Developed data importing utility from AWS into the application.
 • Deployed the app as a docker service.
 • Implemented Continuous Integration and Continuous Delivery using Jenkins, GitHub, and Docker.
 • Used PostgreSQL as database deployed on remote node deployed as docker service.
 • Front-end development with React and React Native
 • CLI on Linux
Environment: Docker, GitHub, JavaScript, Linux, React, Node, Java

Education

Bachelor of Computer Applications, Computer engineering | Gomel State Technical University
 • I am very interested in Programing Language and have studied JavaScript and React js at the university
 • Development front-end with React
 • Integration API
 • Back-end development with Node and Java

Languages

English	—	Fluent
Belarusian	—	Native
